## **DETAILED ACTION**

### ***Election/Restrictions***

Group I, Claims 1-28 have been elected with traverse. Claims 29-33 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 5/28/08.

### ***Specification***

The disclosure and claims are objected to because of the following informalities: “cannister” should be changed to “canister” throughout the specification and claims. Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 26-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board

Art Unit: 3751

of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 26 recites the broad recitation "said paint applicator", and the claim also recites "particularly as defined in any of claims 15 to 25" which is the narrower statement of the range/limitation.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Baumann et al.

A paint delivery and application system (Figure 1), comprising:

a paint supply switching device (FWA or FWB) including at least two sources of paint

Art Unit: 3751

(supply circles A and B)

at least two paint canisters (unlabeled; inherent);

a paint applicator (Z);

a first pair of separate supply lines (ZLA, ZLB) connecting said paint supply switching device (FWA or FWB) and said paint canisters (inherent);

a pigging element (M1A or M1B) movable in each of said first pair of supply lines between a first station (MS1A or MS1B) adjacent said paint supply switching device and a second station (MS2A or MS2B) adjacent one of said paint canisters;

a second pair of separate supply lines (40, 44) Connecting said canisters (34, 36) to said paint applicator (30); and

a pigging element (M2A or M2B) in each of said second pair of separate supply lines (RLA or RLB) movable between a first station adjacent one of said paint canisters (inherent) and a second station adjacent or within said paint applicator (Z);

whereby a first paint may be delivered from a first of said paint canisters (inherent) to said paint applicator (Z) while a second paint is delivered from said paint supply switching device (FWA or FWB) to a second of said paint canisters.

In regard to claim 15, the method as claimed would be inherent during normal use and operation of the device.

***Allowable Subject Matter***

Claims 2-14 and 16-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 26 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 27 and 28 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art pertains to various paint applicators having cleaning systems similar to Applicant's device.
